GOLDIECOIN V5
WHITEPAPER

The Native Omnichain Memecoin
Powered by LayerZero V2

Version: 2.1
Date: January 2026
Network: BNB Smart Chain (BSC) | Base | Ethereum | Arbitrum
Symbol: GOLDI
Total Supply: 32.000.000.000 (Fixed)

Website: https://goldiecoin.fun
Telegram: https://t.me/GoldiecoinX
Twitter: @GoldiecoinX
Email: contact@goldiecoin.fun

TABLE OF CONTENTS

1. EXECUTIVE SUMMARY

GoldieCoin V5 is the first true omnichain memecoin, built on LayerZero V2's Omnichain Fungible Token (OFT) standard. Unlike traditional "multichain" tokens that deploy separate contracts on different blockchains, GoldieCoin exists natively across all supported chains while maintaining a unified total supply of 32 billion tokens.

Key Highlights

- True Omnichain Architecture - Native presence on BSC, Base, Ethereum, and Arbitrum via LayerZero V2
- Community-First Economics - 0% creator fees, 100% of launch liquidity permanently locked
- Sustainable Growth Model - Auto-liquidity mechanism ensures permanent LP growth
- Diamond Paws Staking - 2 billion GOLDI reward pool with 80% ROI for early supporters
- Active Engagement Ecosystem - Weekly community rewards, games, and social amplification programs

- Enhanced Security - 60-day anti-whale protection, maximum fee caps, verified contracts

Just like a Golden Retriever, GoldieCoin embodies loyalty (no rugpulls), trust (transparent and verified), and friendliness (connecting everyone, everywhere).

Official Launch: January 3, 2026 at 21:00 UTC

2. THE PROBLEM

1. Traditional Memecoins: Limited and Risky

Most memecoins suffer from fundamental limitations:

- Single-Chain Isolation - Locked to one blockchain, missing users on other networks
- Unlocked Liquidity - Developers can remove liquidity at any time (rug pull risk)
- No Utility - Pure speculation with no engagement mechanisms
- Passive Experience - Holders have nothing to do except watch price charts
- High Creator Fees - Platforms like pump.fun extract 40% of fees
- Weak Anti-Whale Protection - Most tokens only protect for 5 blocks (~15 seconds)

2. Fake "Multichain" Tokens: Fragmented and Dangerous

Many projects claim to be "multichain" but actually deploy separate token contracts on each blockchain:

- Multiple Separate Supplies - Different token pools on each chain
- Wrapped Versions - Not native tokens, just representations via risky bridges
- Bridge Hack Vulnerabilities - History shows billions lost to bridge exploits
- Fragmented Liquidity - Supply split across chains, reducing overall market depth
- Complex UX - Users struggle with bridging, slippage, and multiple contract addresses

3. Lack of Community Value

Most memecoins offer no value to active community members:

- No rewards for engagement
- No incentives for social promotion
- No staking or yield opportunities
- No games or interactive features

3. THE GOLDIECOIN SOLUTION

GoldieCoin V5 addresses these problems through innovative technology and community-first design.

1. True Omnichain Technology

Built on LayerZero V2's OFT (Omnichain Fungible Token) standard:

- Single Unified Supply - 32 billion GOLDI shared across all chains, not separate pools
- Native on Every Chain - Real tokens, not wrapped versions
- No Bridge Risks - LayerZero V2 messaging eliminates traditional bridge vulnerabilities
- Seamless Transfers - Move tokens between chains in seconds
- Gas-Efficient - Optimized cross-chain communication

2. Community-First Economics

0% Creator Fees - Unlike pump.fun (40% fees), GoldieCoin gives 100% to the community:

- Permanently Locked Liquidity - LP tokens burned to 0xdead address (impossible to remove)
- Auto-Liquidity Growth - Trading fees automatically add to LP forever
- 60-Day Anti-Whale Protection - Not just 5 blocks, but 60 full days of fair distribution
- Maximum Fee Protection - Hardcoded 2.5% fee cap (cannot be changed by anyone)

3. Active Engagement Ecosystem

GoldieCoin rewards participation, not just holding:

- Diamond Paws Staking - 2 billion GOLDI rewards, up to 80% ROI
- Weekly Community Rewards - 25,000 GOLDI distributed to active members
- Social Amplifier Program - Earn by promoting GoldieCoin on social media
- Interactive Games - Hangman, Lucky Wheel, Guess the Number, Lore Events
- Referral System - Get rewarded for inviting friends

4. The Golden Retriever Philosophy

- Loyalty - No rugpulls, no broken promises. Liquidity permanently locked.
- Trust - Verified contracts, public security audits, transparent operations.
- Friendliness - Connecting everyone, everywhere. Native on all major chains.

5. <u>TOKEN INFORMATION</u>

Contract Addresses

BNB Smart Chain (BSC) - Origin Chain
- Token Contract: 0x0FD9CCC81857F2883F38ed2AD5ce826a91785627
- PancakeSwap Pair: 0xc0c0a3d44a026bEbD1edaB5cD181fFfffafa2fC45
- DiamondPaws Staking: 0xb02B1F50884EdFdCFC85A0a4142AEe831360F21a
- Chain ID: 56

- Verification:
[BSCScan](https://bscscan.com/address/0x0FD9CCC81857F2883F38ed2AD5ce826a91785627)

Base Network
- Token Contract: 0x724100F1B0D5D486016965C14fF9125bD31a8f6E
- Chain ID: 8453
- Verification:
[BaseScan](https://basescan.org/address/0x724100F1B0D5D486016965C14fF9125bD31a8f6E)
- Status: Contract deployed, trading coming soon

Future Deployments (Q1-Q3 2026)
- Ethereum Mainnet - Via LayerZero V2
- Arbitrum - Via LayerZero V2

- Token Specifications

Property	Value
Name	Goldiecoin
Symbol	GOLDI
Total Supply	32,000,000,000 (32 Billion)
Decimals	18
Standard	ERC20 + LayerZero V2 OFT
Mintable	No (Fixed supply)/ Yes Omnichain function)
Burnable	Yes (LP and Omnichain function)
Pausable	Yes (Emergency only)

TOKENOMICS

Total Supply Allocation			
32.00.000.000 GOLDI Fixed over all chains (Omnichain technology)			
Allocation	Amount (GOLDI)	Percentage	Purpose
Liquidity Pool	8.000.000.000	25%	permanent DEX liquidity (LP burned)
Community Treasury	17.000.000.000	53%	Listings, Omnichain LPs
Strategic Reserve	5.000.000.000	16%	Airdrops, giveaways, bot rewards, DiamondPaws Staking
Team & Development	2.000.000.000	6%	Long-term development

Launch Liquidity (BSC)

Initial Pair: 0.5 BNB + 8.000.000.000 GOLDI
Status: LP tokens permanently burned to
0x000000000000000000000000000000000000dEaD
Result: Liquidity can NEVER be removed (rugpull impossible)

Fee Structure

Buy Fees
- 0.25% @ Auto-Liquidity mechanism
- All fees go to growing the LP, not to creators

Sell Fees
- 2.0% total
  - 50% @ Auto-Liquidity (increases LP depth)
  - 50% @ Community Treasury (rewards, marketing, growth)

Fee Protection
- Maximum Fee Cap* 2.5% (hardcoded, cannot be changed)
- No Hidden Fees: Transparent and verifiable on-chain
- Creator Takes: 0% (100% goes to community and LP)

Anti-Whale & Anti-Bot Protection

Anti-Bot Period
- Duration: 10 minutes after trading enabled
- Protection: Transaction limits, blacklist capability
- Auto-Disable: Bot protection automatically ends after 10 minutes

Anti-Whale System
- Duration: 60 days (not just 5 blocks like other tokens!)
- Mechanism: Maximum wallet limit enforced
- Purpose: Prevent pump-and-dump schemes, ensure fair distribution
- After 60 Days: Restrictions lift, free trading resumes

Liquidity Growth Mechanism

GoldieCoin features a perpetual liquidity growth system:

1. Every trade generates fees (0.25% buy, 2% sell)
2. Fees automatically convert to LP tokens
3. LP tokens are immediately locked (cannot be removed)
4. Liquidity pool grows forever
5. Price stability increases over time

Result: Unlike tokens that launch with low liquidity and never grow it,
GoldieCoin's liquidity increases with every transaction, forever.

6. **TECHNICAL ARCHITECTURE**

LayerZero V2 OFT Implementation

GoldieCoin is built on **LayerZero V2's Omnichain Fungible Token (OFT)
standard, representing the cutting edge of cross-chain token technology.

What is LayerZero V2?

LayerZero is an omnichain interoperability protocol that enables seamless
communication between blockchains. Unlike traditional bridges that lock
tokens on one chain and mint wrapped versions on another, LayerZero
enables **true native tokens** across multiple chains.

How GoldieCoin Uses LayerZero V2

Traditional "Multichain" Token:
BSC Contract: 10B supply (separate)
Ethereum Contract: 10B supply (separate)
Bridge: Wrapped tokens, hack risk
Total Supply: 20B+ (fragmented)

GoldieCoin (True Omnichain):

```
All Chains:        32B supply (unified)
Cross-Chain:       Native GOLDI on every chain
Bridge:            Built-in LayerZero V2 messaging
Total Supply:      32B (shared across all chains)
```

Key Technical Benefits

1. Unified Supply
   - 32 billion GOLDI exists across ALL chains combined
   - Supply cannot be inflated by multichain deployment
   - Transparent and verifiable

2. Native Tokens Everywhere
   - GOLDI on BSC = GOLDI on Base = GOLDI on Ethereum
   - No wrapped versions (wGOLDI, bGOLDI, etc.)
   - Same contract interaction on every chain

3. Secure Cross-Chain Transfers
   - LayerZero V2's trustless messaging
   - No third-party bridge operators
   - No bridge hack vulnerabilities
   - Peer-to-peer chain communication

4. Gas-Efficient Operations
   - Optimized cross-chain messaging
   - Lower fees than traditional bridges
   - Automatic gas estimation

Smart Contract Architecture

GoldieCoin's smart contract is built using industry-standard OpenZeppelin libraries:

Core Components

ERC20 Standard
- Standard token interface
- Transfer, approve, allowance functions
- Events for transparency

AccessControl
- Role-based permissions
- Admin, Operator roles
- Timelock protection for critical functions

Pausable
- Emergency pause capability
- Protects against exploits
- Requires timelock delay (24 hours)

ReentrancyGuard
- Prevents reentrancy attacks
- Protects during cross-chain operations
- Essential for LayerZero integration

Security Features

- OpenZeppelin Libraries - Battle-tested code used by thousands of
    projects
  - No Private Keys on Frontend - Website is client-side only
  - Maximum Fee Protection - 0.1 BNB/ETH bridge limit
  - Content Security Policy - CSP headers prevent XSS attacks
  - HTTPS Enforcement - All connections encrypted
  - Input Validation - Extensive validation on all user inputs
  - Emergency Pause*- Can pause in case of discovered vulnerability

Cross-Chain Bridge Interface

GoldieCoin provides a user-friendly bridge interface at
goldiecoin.fun/bridge.html

Features

- Seamless Transfers - Move GOLDI between BSC and Base in seconds
- MetaMask Integration - One-click connection
- Automatic Chain Switching - Bridge detects and suggests correct network
- Real-Time Gas Estimation - See fees before confirming
- Transaction History - Track all your bridge operations
- Maximum Fee Protection - Prevents overpaying for gas
- Input Validation - Ensures you have sufficient balance and gas

How It Works

1. User connects MetaMask wallet
2. Selects source chain (e.g., BSC) and destination chain (e.g., Base)
3. Enters GOLDI amount to bridge
4. Bridge calculates gas fees and displays total cost
5. User confirms transaction
6. LayerZero V2 handles the cross-chain messaging
7. GOLDI arrives on destination chain in ~1-2 minutes

No wrapped tokens. No bridge operators. No trust required.

7. DIAMOND PAWS STAKING

Overview

Diamond Paws is GoldieCoin's flagship staking program, offering
guaranteed rewards to early supporters who lock their GOLDI for 60 days.

Contract Details

- Contract Address (BSC): 0x6f055BBd8Cd6237c8A9FCBE6e90c1B9d8E061Ad8
- Total Reward Budget: 2,000,000,000 GOLDI (pre-funded)
- Verification:
[BSCScan]https://bscscan.com/address/0xb02B1F50884EdFdCFC85A0a4142AEe8
31360F21a

Staking Requirements

- Minimum Stake: 10.000.000 GOLDI
- Lock Period: 60 days (enforced by smart contract)
- Maximum Positions: 650 (first-come, first-served)
- Network: BNB Smart Chain only

How It Works

1. Check Available Positions
   - Visit goldiecoin.fun/diamond-paws.html
   - See current tier and available spots

2. Stake Your GOLDI
   - Connect MetaMask wallet
   - Approve GOLDI spending
   - Stake minimum 10.000.000 GOLDI
   - Receive tier assignment based on position

3. Wait 60 Days
   - Tokens are locked in smart contract
   - No early withdrawal possible (emergency option forfeits rewards)
   - Track countdown on dashboard

4. Claim Rewards
   - After 60 days, claim original stake + rewards
   - Automatic calculation
   - One transaction claims everything

Example Calculations

Legendary Tier (Position #50):
- Stake: 10.000.000 GOLDI
- Lock Period: 60 days
- Reward: 8,000,000 GOLDI
- Total Received: 18,000,000 GOLDI
- ROI: 80% (in 2 months!)

Early Bird Tier (Position #250):
- Stake: 10.000.000 GOLDI
- Lock Period: 60 days
- Reward: 3.000.000 GOLDI
- Total Received: 13.000.000 GOLDI
- ROI: 30%

Supporter Tier (Position #500):
- Stake: 10.000.000 GOLDI
- Lock Period: 60 days
- Reward: 1.200.000 GOLDI
- Total Received: 11.200.000 GOLDI
- ROI: 12%

Security Features

   - 100% On-Chain - All logic enforced by smart contract
   - Pre-Funded - 2B GOLDI already deposited, verifiable on BSCScan
   - Transparent - All stakes and rewards publicly visible
   - No Admin Control - Cannot change rewards after contract deployment
   - Emergency Withdraw - Option to withdraw early (forfeits rewards)

Why Diamond Paws?

- Guaranteed Returns - No market risk, rewards pre-funded
- Reduces Circulating Supply - 2B GOLDI locked for 60 days
- Rewards Early Supporters - Higher returns for earlier participants
- Fully Transparent - Everything verifiable on-chain
- No Rug Risk - Smart contract enforced, no human control

8. COMMUNITY REWARDS ECOSYSTEM

GoldieCoin features the most comprehensive community rewards program in the memecoin space.

1. Weekly Activity Rewards

How to Earn Points

- Send Messages - 1 point per message (minimum 10 characters)
- React with Emojis - Engagement rewards
- Play Games - Bonus points for winners
- Daily Check-In - Consistency bonuses
- Referrals - Invite friends for extra points

Leaderboard System

- Top 10 members share weekly GOLDI rewards
- Real-time leaderboard visible in Telegram bot
- Fair distribution based on engagement score
- Moderators compete separately

2. Social Amplifier Program

Earn GOLDI by promoting GoldieCoin on social media!

Platform Points System

Platform	Points per Post
YouTube Video	300 points
TikTok	150 points
Twitter/X	100 points
Instagram	100 points
Reddit	75 points
Telegram	50 points

3. Interactive Games

GoldieCoin offers multiple games with GOLDI rewards:

Hangman
- Guess crypto-related words
- Winner gets +10 bonus points
- 5 categories, 50+ words
- 5-minute time limit
- Daily limit: 2 games per person

Lucky Wheel (/spin)
- Spin once per day for random points
- 9 possible outcomes: Jackpot (+25) to Disaster (-7)
- Weighted chances (better outcomes rarer)
- Even negative spins are small
- Pure daily bonus fun

Guess the Number
- Community game: Guess 1-100
- First correct guess wins +10 points
- Get hints: "higher" or "lower"
- Each user can start 2 games per day
- Only one game active at a time

Goldie's Lore Events
- Automatic crypto lore stories every 13-93 minutes
- 100 different scenarios
- 3 choices (A/B/C)
- First to answer: +40 correct / -10 wrong
- No command needed

4. Wallet Verification System

To receive GOLDI rewards, users must verify their wallet:

Security Features
- No private keys ever shared
- Signature verification prevents fake claims
- Automatic balance checks
- Secure and transparent

5. Referral System

Invite friends and earn bonus points!

- Command: /referral to get your code
- Friend Registers: /register [your-code]
- Both Earn: Referrer and referee get points
- Maximum: 50 referrals per user
- Tracking: View stats with /referrals

6. Price Tracking & Notifications

The community bot provides real-time price updates:

- DexScreener integration
- Live price feed
- Market cap tracking
- Volume statistics
- Automatic notifications
- /price command for instant quotes

9. ROADMAP

GoldieCoin's roadmap is divided into four strategic phases, focusing on sustainable growth and ecosystem expansion.

🔧 **Phase 1: Community Growth & Tech Deployment (Completed)**
✅ Deploy GoldiecoinV5 on BSC Mainnet (Origin Chain)
✅ Deploy on Base Network via LayerZero V2
✅ Verify contracts on BSCScan & BaseScan
✅ Launch website & social communities
✅ Launch Community Rewards Bot
✅ First giveaway and Telegram Rewards payout
✅ Add initial liquidity (0.5 BNB + 8B GOLDI)
✅ Burn BNB / GOLDI LP tokens to 0xdead permanently
✅ Enable trading on PancakeSwap (BSC)

🚀 **Phase 2: Omnichain Launch (Current)**
⏱ Burn Base / GOLDI LP tokens to 0xdead permanently
⏱ Enable Tranding on Base
⏱ Launch cross-chain bridge interface
⏱ Diamond Paws Program activation
⏱ Reach 100+ Holders milestone
⏱ Apply to CoinGecko & CoinMarketCap
⏱ Apply to BSC Scan Tokeninfo
⏱ CoinGecko & CMC listings live

🌆 **Phase 3: Ecosystem Expansion**
⏱ Deploy $GOLDI on Arbitrum
⏱ Deploy $GOLDI on Polygon
⏱ Deploy $GOLDI on Sei
⏱ Deploy $GOLDI on Optimism
⏱ Deploy $GOLDI on opBNB
⏱ Deploy $GOLDI on Avalanche
⏱ Deploy $GOLDI on Sonic
⏱ Assess & Deploy $GOLDI on Metis/Blast

🏰 **Phase 4: Decentralization**

⏱ Renounce ownership

10. <u>SECURITY & AUDITS</u>

Security Rating: 9/10

Goldiecoin has undergone extensive security analysis and implements industry-best practices.

Smart Contract Security Features

1. OpenZeppelin Libraries
    - Battle-tested code used by thousands of projects
    - Regular security updates and patches
    - Industry-standard implementations
    - Solidity ^0.8.20 with OpenZeppelin v4.x

2. Access Control
    - Owner-based permission system
    - All owner functions become disabled after renouncement
    - Transparent on-chain operations
    - Plan: Owner renouncement within 30 days post-launch

3. ReentrancyGuard
    - Protects against reentrancy attacks
    - Essential for cross-chain operations (LayerZero)
    - Prevents common exploit vectors

4. Pausable Emergency System
   - Emergency pause capability (only pre-renouncement)
   - Protects users during critical vulnerabilities
   - Transparent and on-chain
   - Becomes permanently disabled after owner renouncement

5. Maximum Fee Protection
   - 2% sell fee, 0.25% buy fee (hardcoded)
   - 3% absolute maximum possible (cannot be exceeded)
   - Protects users from malicious fee changes
   - Immutable after owner renouncement

Website Security (Implemented January 2025)

1. Content Security Policy (CSP)
   - Strict CSP: No `unsafe-inline`, no `unsafe-eval` for scripts
   - Prevents XSS attacks
   - Restricts script execution to trusted CDNs only
   - HTTPS enforcement

2. DOMPurify XSS Protection
   - All user inputs sanitized via DOMPurify v3.0.6
   - Prevents code injection through error messages
   - Fallback HTML entity encoding
   - Zero XSS vulnerabilities

3. RPC Response Validation
   - Triple fallback RPC providers per chain:
     - BSC: Binance, Defibit, Ninicoin
     - Base: Official, LlamaRPC, PublicNode
   - Response validation (BigNumber checks, overflow protection)
   - 5-second timeout per provider
   - Prevents manipulation by compromised nodes

4. Progressive Fee Warnings
   - Warning at 0.02 BNB/ETH (confirmation required)
   - Block transaction at 0.1 BNB/ETH (maximum protection)
   - Protects users from network congestion exploitation
   - Real-time gas estimation

5. Client-Side Only Architecture
   - No server-side code
   - No private keys on server
   - No database storing sensitive data
   - Users always in full control

6. MetaMask Integration Security
   - Never requests private keys
   - Only transaction signature verification
   - Users approve all transactions explicitly
   - Transparent permission requests

7. Input Validation
   - All user inputs validated client-side
   - Address validation (0x[40 hex])
   - Amount validation (numeric only)
   - Balance checks before transactions

DiamondPaws V2 Security

Contract Address: 0xb02B1F50884EdFdCFC85A0a4142AEe831360F21a

V2 Critical Fix:

- ✅ Race condition in tier assignment FIXED
- ✅ Atomic spot index assignment
- ✅ Budget overflow impossible
- ✅ First-come, first-served guaranteed
- ✅ NonReentrant protection

Security Audit Report

Full Self-Audit: Available at
https://goldiecoin.fun/Goldiecoin_Security_Self_Audit_2025.pdf

Audit Summary:
- 4 Critical/High issues identified → All resolved or mitigated
- 5 Website vulnerabilities fixed
- 1 DiamondPaws race condition fixed in V2
- Overall Assessment: **PRODUCTION READY**

Post-Owner-Renouncement:
- All owner functions become permanently disabled
- Contract becomes fully immutable
- Zero admin keys
- Community-owned and decentralized

Verified Contracts

- ✅ BSC:
https://bscscan.com/address/0x0FD9CCC81857F2883F38ed2AD5ce826a91785627
- ✅ Base:
https://basescan.org/address/0x724100F1B0D5D486016965C14fF9125bD31a8f6E
- ✅ DiamondPaws V2:
https://bscscan.com/address/0xb02B1F50884EdFdCFC85A0a4142AEe831360F21a

11.   <u>**TEAM & CONTACT**</u>

Core Team

Goldiecoin is developed by experienced blockchain developers committed to
transparency and long-term protocol success.

Core Developer / Founder
- Responsibilities: Smart contract architecture, LayerZero integration,
protocol development
- Background: Blockchain development, DeFi protocols, smart contract
security
- Commitment: Long-term protocol stewardship

Why Anonymous?
- Common practice in DeFi and crypto projects
- Liquidity permanently locked (trustless)
- Smart contracts enforced (not dependent on team)
- Code speaks louder than names

Official Communication Channels

Website
- Primary: https://goldiecoin.fun
- Bridge: https://goldiecoin.fun/bridge.html
- Staking: https://goldiecoin.fun/diamond-paws.html
- Rewards: https://goldiecoin.fun/rewards.html

Social Media
- Telegram Community: https://t.me/GoldiecoinX
- Twitter/X: @GoldiecoinX
- Email: contact@goldiecoin.fun

Important Reminders

The Goldiecoin team will NEVER:
- DM you first on Telegram
- Ask for your private keys or seed phrases
- Request money or tokens
- Promise guaranteed returns
- Ask you to send GOLDI for verification

Always verify:
- Contract addresses on official website
- Links before clicking
- Team messages in official channels only
- Any announcement with moderators

Partnership Inquiries

For business partnerships, collaborations, or marketing opportunities:

Email: contact@goldiecoin.fun

Please include:
- Your name and organization
- Type of partnership proposal
- Expected outcomes
- Timeline and deliverables

12.   LEGAL DISCLAIMER

PLEASE READ THIS DISCLAIMER CAREFULLY BEFORE PURCHASING OR USING
GOLDIECOIN (GOLDI)

1. No Investment Advice

This whitepaper and all Goldiecoin communications are for informational
purposes only and do not constitute investment, financial, legal, or tax
advice. Goldiecoin is a memecoin created for entertainment and community
engagement purposes.

YOU SHOULD NOT:
- Invest money you cannot afford to lose
- Consider GOLDI as an investment vehicle
- Rely on this whitepaper as financial advice
- Make decisions based solely on this document

2. High Risk and Volatility

Cryptocurrency investments, especially memecoins, are highly speculative and carry extreme risk.

RISK FACTORS:
- Price Volatility - GOLDI price can fluctuate dramatically
- Total Loss Possible - You may lose 100% of your investment
- No Guaranteed Returns - Past performance does not indicate future results
- Market Risk - Crypto markets can crash suddenly
- Liquidity Risk - May be difficult to sell during market stress

3. Do Your Own Research (DYOR)

Every cryptocurrency investor must conduct independent research and due diligence.

BEFORE BUYING GOLDI:
- Read and understand this entire whitepaper
- Verify all contract addresses on official website
- Check smart contract code on BSCScan/BaseScan
- Understand how LayerZero V2 works
- Review tokenomics and fee structure
- Assess your own risk tolerance

4. No Guarantees or Promises

Goldiecoin makes NO GUARANTEES regarding:
- Future token price or market cap
- Exchange listings (CEX or DEX)
- Partnership announcements
- Roadmap timeline delivery
- Return on investment
- Staking rewards (subject to smart contract execution)

5. Regulatory Uncertainty

Cryptocurrency regulations vary by jurisdiction and are constantly evolving.

YOUR RESPONSIBILITY:
- Comply with local laws and regulations
- Understand tax obligations in your country
- Determine if purchasing GOLDI is legal where you live
- Consult legal and tax professionals if needed

Goldiecoin is NOT responsible for:
- Your compliance with local regulations
- Tax reporting or payments
- Legal issues arising from your purchase
- Regulatory changes affecting access

6. Smart Contract Risks

Despite security audits and best practices, smart contracts may contain unforeseen vulnerabilities.

POTENTIAL RISKS:
- Undiscovered bugs or exploits
- LayerZero V2 protocol risks

- Blockchain network issues
- Gas fee volatility
- Front-running attacks
- MEV (Maximal Extractable Value) exploitation

USE AT YOUR OWN RISK

7. No Refunds or Chargebacks

All cryptocurrency transactions are final and irreversible.

UNDERSTAND THAT:
- Once you buy GOLDI, the transaction cannot be reversed
- No refunds will be provided under any circumstances
- Lost or stolen tokens cannot be recovered
- Incorrect transactions cannot be undone
- Customer support cannot reverse blockchain transactions

8. Community Rewards Program

The community rewards program (Telegram bot, staking, games) is voluntary and experimental.

IMPORTANT NOTES:
- GOLDI tokens have no guaranteed monetary value
- Rewards are subject to smart contract execution
- Program may be modified or discontinued
- Not employment or contractual obligation
- Participation is voluntary
- No guaranteed weekly earnings

9. Third-Party Services

Goldiecoin integrates with third-party services (MetaMask, PancakeSwap, LayerZero, DexScreener, etc.).

DISCLAIMER:
- We do not control third-party services
- Third-party risks are your responsibility
- Always verify links and addresses
- Use official integrations only
- Third-party fees may apply

10. Age Requirement

You must be 18 years or older (or legal age in your jurisdiction) to purchase or use GOLDI.

11. No Securities Offering

GOLDI is a utility token, NOT a security.

GOLDI DOES NOT:
- Represent ownership in any company
- Provide voting rights in a corporation
- Guarantee dividends or profit-sharing
- Constitute an investment contract
- Offer equity or debt instruments

12. Forward-Looking Statements

This whitepaper contains forward-looking statements about roadmap, features, and plans.

THESE STATEMENTS:
- Are not guarantees of future performance
- Are subject to change without notice
- May not be achieved as described
- Depend on factors outside our control
- Should not be relied upon as promises

13. Limitation of Liability

To the maximum extent permitted by law, the Goldiecoin team, developers, and contributors:

ARE NOT LIABLE FOR:
- Any financial losses from buying, holding, or selling GOLDI
- Smart contract bugs or exploits
- Third-party service failures
- Blockchain network issues
- Regulatory actions or changes
- Market volatility or crashes
- Hacks, scams, or phishing attacks
- Lost private keys or wallet access

14. Independent Decision

By purchasing GOLDI, you acknowledge that:

You have read and understood this disclaimer
You are making an independent decision
You understand the high risks involved
You can afford to lose your entire investment
You comply with all local laws and regulations
You will not hold the team liable for any losses
You are 18+ years old (or legal age in your jurisdiction)

15. Changes to This Disclaimer

This disclaimer may be updated periodically. Continued use of GOLDI constitutes acceptance of any changes.

CHECK FOR UPDATES: goldiecoin.fun

13.   **FINAL STATEMENT**

GOLDIECOIN IS A MEMECOIN CREATED FOR FUN, COMMUNITY, AND ENTERTAINMENT.

We believe in:
- Building genuine community connections
- Creating engaging experiences
- Transparent and fair token distribution
- True omnichain technology
- Long-term sustainable growth

But we are HONEST about risks:
- Memecoins are highly speculative

- You could lose everything
- No guaranteed returns
- Extreme volatility is normal

If you can't afford to lose it, don't buy it.

If you understand the risks and want to join the Goldie community, we welcome you with open paws!

APPENDIX

Glossary of Terms

BNB Smart Chain (BSC)** - Blockchain network created by Binance, compatible with Ethereum
Base - Layer 2 blockchain built by Coinbase, focused on low fees and scalability
CEX - Centralized Exchange (e.g., Binance, Coinbase)
DEX - Decentralized Exchange (e.g., PancakeSwap, Uniswap)
DeFi - Decentralized Finance
DYOR - Do Your Own Research
LayerZero - Omnichain interoperability protocol enabling cross-chain communication
LP - Liquidity Pool
OFT - Omnichain Fungible Token (LayerZero V2 standard)
Omnichain - Existing natively on multiple blockchains simultaneously with unified supply
Rugpull - When developers remove liquidity, stealing investor funds
Staking - Locking tokens in a smart contract to earn rewards
Tokenomics - Token economics and distribution model
Wallet - Software for storing cryptocurrency (e.g., MetaMask, Trust Wallet)

Frequently Asked Questions

Q: Is GoldieCoin a good investment?
A: GoldieCoin is a memecoin for entertainment, not an investment vehicle. It's highly risky and you could lose everything. Only participate if you can afford to lose your entire investment.

Q: Why can't I see my GOLDI in my wallet?
A: You need to manually add the token to MetaMask using the contract address. Visit goldiecoin.fun for the correct address.

Q: How do I bridge GOLDI between chains?

A: Use the official bridge at goldiecoin.fun/bridge.html. Connect MetaMask, select chains, enter amount, and confirm.

Q: When will GOLDI be on Binance?
A: We have no confirmed CEX listings. Roadmap targets tier-2 exchanges first (Q2 2026), then tier-1 exchanges later (Q4 2026). No guarantees.

Q: How do I join the staking program?
A: Visit goldiecoin.fun/diamond-paws.html, connect wallet, stake minimum 10M GOLDI for 60 days. Rewards based on position.

Q: Is the liquidity locked?
A: Yes! LP tokens are permanently burned to the 0xdead address. Verifiable on BSCScan. Rugpull is impossible.

Q: How do I earn community rewards?
A: Join the Telegram community, verify your wallet (min 100k GOLDI), participate in chats, play games, and complete daily activities.

Q: What's the difference between omnichain and multichain?
A: Multichain = separate token contracts on each chain. Omnichain = single unified token native on all chains. GoldieCoin is true omnichain via LayerZero V2.

Q: Can the team increase fees or change tokenomics?
A: No. Maximum fee is hardcoded at 2.5% and cannot be changed by anyone. Tokenomics are immutable. Total supply is fixed at 32B.

Q: Is this a rug pull?
A: No. Liquidity is permanently locked (LP burned to 0xdead), contracts are verified, and tokenomics are transparent. The team cannot remove funds.

Q: Who is the team?
A: The core developer remains pseudonymous (common in DeFi). The protocol is designed to be trustless - liquidity locked, contracts enforced, no centralized control.

Q: Why should I buy GOLDI instead of other memecoins?
A: GoldieCoin offers true omnichain technology, permanently locked liquidity, 60-day anti-whale protection, staking rewards, and an active community ecosystem. But remember, all memecoins are risky.

Made with heart › by the Goldiecoin Community
